Limer's Capital — Competitive Scorecard vs. Colosseum Builder Database

Date: April 1, 2026 **Source**: Colosseum Copilot API (5,400+ Solana hackathon projects, 5 hackathon editions, accelerator portfolio) **Methodology**: 6 parallel searches across education+gamification, paper trading+emerging markets, learn-to-earn, perpetuals simulation, LP tools (winners only), and Caribbean/regional focus. Full project details retrieved for top matches. Accelerator portfolio cross-checked.

Executive Summary

Across Colosseum's entire 5,400+ project database spanning 5 hackathons (Hyperdrive through Cypherpunk), **no project combines all of Limer's Capital's core features**: structured crypto education, paper trading simulation, real on-chain swaps, perpetuals, gamified progression, LP analysis, and Caribbean regional focus. Limer's sits at the intersection of two clusters — "Gamified Web3 Education" (162 projects) and "Gamified Crypto Trading and Competition" (163 projects) — and is the only project that bridges both.

The 12 Closest Competitors

Tier 1 — Accelerator Companies (Highest Threat)

Rekt — Cypherpunk Hackathon (Sep 2025)

- 3rd Place DeFi ($15,000) → Accepted into C4 Accelerator
- Gamified mobile perpetuals trading app, $1 minimum trades, BTC/ETH/SOL
- Points system, leaderboards, mini-games ("Ride the Wave")
- Team: 2 members
- Overlap: Perps + gamification + leaderboard
- Gap: No education, no paper trading, no simulation, no regional focus

The Arena — Radar Hackathon (Sep 2024)

- 2nd Place Gaming ($20,000) → Accepted into C2 Accelerator (as "Monsters")
- PvP social trading game, compete to become best trader
- Team: 5 members
- Overlap: Competition + leaderboard + social-fi
- Gap: No education, no simulation, no emerging market focus

Tier 2 — Paper Trading Platforms (Moderate Overlap)

Trenchers Paper Trading — Breakout Hackathon (Apr 2025)

- No prize, no accelerator
- Paper trading simulator for Solana memecoins
- Real-time market data, performance tracking
- Team: 2 members
- Overlap: Paper trading, portfolio tracking
- Gap: No education, no gamification, no real swaps, no perps, no regional focus

TradeFlow.fun — Breakout Hackathon (Apr 2025)

- No prize, no accelerator
- Paper trading for memecoins with competitions and cash prizes
- Browser extension integration
- Team: 1 member
- Overlap: Paper trading + competitions
- Gap: No education, no real swaps, no perps, no regional focus

XDEGEN — Radar Hackathon (Sep 2024)

- No prize, no accelerator
- Simulated crypto trading platform for skill development
- Team: 4 members
- Overlap: Paper trading + gamified learning
- Gap: No structured education content, no real swaps, no perps

Tier 3 — Education Platforms (Partial Overlap)

LEarn — Radar Hackathon (Sep 2024)

- No prize, no accelerator
- Gamified learning platform, token rewards for completing content
- Team: 1 member
- Overlap: Learn-to-earn + gamification
- Gap: No trading of any kind

LearnFi — Cypherpunk Hackathon (Sep 2025)

- No prize, no accelerator
- Learn-to-earn with NFT content monetization
- Team: 5 members (3 weekly updates)
- Overlap: Learn-to-earn + token rewards
- Gap: No trading, no regional focus

SolQuest.io — Breakout Hackathon (Apr 2025)

- No prize, no accelerator
- Quest-based Solana education with rewards
- Team: 2 members
- Overlap: Gamified quests
- Gap: No trading

BitEdu — Cypherpunk Hackathon (Sep 2025)

- No prize, no accelerator
- AI-generated crypto curriculum, wallet-first
- Team: 1 member
- Overlap: Wallet-first education
- Gap: No trading

Tier 4 — Regional/Emerging Market (Tangential)

Avici — Renaissance Hackathon (Mar 2024)

- Honorable Mention — DeFi & Payments
- P2P DEX for emerging markets, mobile-first
- Team: 2 members
- Overlap: Emerging market focus
- Gap: No education, no simulation

Kérdos Markets — Cypherpunk Hackathon (Sep 2025)

- No prize, no accelerator
- On-chain prediction markets for Latin America
- Team: 1 member
- Overlap: Regional (LatAm) focus
- Gap: No education, no trading simulation

The Fed Simulator — Breakout Hackathon (Apr 2025)

- No prize, no accelerator
- Economic simulation game (play as Fed Chair)
- Team: 2 members
- Overlap: Financial education via gamified simulation

- Gap: No real trading, no crypto education

Feature Comparison Matrix

Feature	Limer's Capital	Rekt (C4)	The Arena (C2)	Trenchers	TradeFlow	XDEGEN	LEarn	LearnFi
Structured Education (modules/lessons)	40+ lessons, 8 modules	—	—	—	—	—	Basic	Basic
Server-Validated Quizzes	8 quizzes	—	—	—	—	—	—	—
Paper Trading (spot)	14 tokens + 30 TTSE stocks	—	—	Memecoins	Memecoins	Crypto	—	—
Perpetuals Simulator	20x leverage, full liquidation engine	Real perps	—	—	—	—	—	—
Real On-Chain Swaps	Jupiter V6	Real perps	Real trades	—	—	—	—	—
XP / Points System	10-tier, 25 badges, streaks	Points	Leaderboard	—	Rewards	Basic	Tokens	NFTs
Trading Competitions	5-metric scoring engine	Leaderboard	PvP (core feature)	—	Contests	—	—	—
LP Analyzer	Meteora data, IL calc, risk scoring	—	—	—	—	—	—	—
Regional Market Focus	Caribbean (T&T, TTSE, Wam)	—	—	—	—	—	—	—
Fiat On-Ramp Partner	Wam (TTD to crypto)	—	—	—	—	—	—	—
Internationalization	EN / ES / FR	—	—	—	—	—	—	—
On-Chain Profile	Solana program (badges, trades)	—	—	—	—	—	On-chain	NFT creds
Tokenomics Design	$LIMER (1B supply, 7 revenue streams)	Points	Token	—	—	—	Token	Token
Test Suite	189 tests across 7 files	Unknown	Unknown	Unknown	Unknown	Unknown	Unknown	Unknown
Team Size	Solo founder	2	5	2	1	4	1	5

Cluster Analysis

Limer's Capital uniquely bridges two major Colosseum clusters:

Cluster v1-c24: "Gamified Web3 Education on Solana"

- 162 projects, 3 winners
- Dominated by quiz-and-token platforms
- Top problem tags: low student engagement, high barrier to entry, credential fraud
- None include trading functionality

Cluster v1-c6: "Gamified Crypto Trading and Competition"

- 163 projects, 12 winners
- Dominated by trading games and PvP competition

- Top problem tags: low community engagement, boring trading interfaces
- None include structured education

Limer's is the only project that serves both clusters — too much trading depth for the education cluster, too much educational structure for the trading cluster. This cross-cluster positioning is a defensible differentiation.

Accelerator Portfolio Check

Among all Colosseum accelerator companies, the most relevant are:

Company	Batch	Overlap	Missing vs. Limer's
Rekt	C4	Gamified perps + points	Education, paper trading, regional focus, LP tools
The Arena / Monsters	C2	PvP trading competitions	Education, simulation, regional focus
Trenches.top	C2	Reputation trading + tournaments	Education, paper trading, emerging markets
grid.wtf / AlphaFC	C2	Modular trading terminal	Education, gamification, regional focus
MetEngine	C3	Automated LP + copy-trading	Education, paper trading, gamification
TypeX Keyboard	C3	Gamified mobile + wallet	Education, trading depth, regional focus

No accelerator company combines education + paper trading + real swaps + gamification. Limer's full-stack approach is unique in the portfolio.

Scoring: Limer's Capital vs. Top Competitors

Scored against Colosseum's published judging criteria:

Criterion	Limer's Capital	Rekt (C4)	The Arena (C2)	Trenchers	LEarn
Functionality	**9/10**	7/10	7/10	5/10	4/10
Potential Impact	**9/10**	7/10	6/10	5/10	5/10
Novelty	**9/10**	7/10	7/10	4/10	4/10
UX / Design	**9/10**	8/10	7/10	6/10	5/10
Business Plan	**8/10**	7/10	6/10	4/10	4/10
TOTAL	**44/50**	**36/50**	**33/50**	**24/50**	**22/50**

Functionality: 17 pages, 4 trading modes (spot paper, TTSE paper, perps simulator, Jupiter real swaps), 8 education modules, 40+ lessons, competition engine, Agent Squeeze LP analyzer, on-chain profile program. 189 tests across 7 files.

Potential Impact: 700M+ unserved Caribbean and Latin American population. Trinidad & Tobago VASP Act 2025 creates first regulated crypto framework in English-speaking Caribbean. Local fiat on-ramp partner (Wam). Caribbean fintech market at $1.2B with 18.5% CAGR.

Novelty: Only project in the entire corpus combining structured education, paper trading, real on-chain swaps, perpetuals simulation, gamified progression, LP analysis, and regional market focus. Cross-cluster positioning is unique.

UX / Design: Unified dark theme across all trading views, Framer Motion animations, holographic achievement badges, responsive mobile support, i18n in 3 languages.

Business Plan: 7 defined revenue streams (spot fees 30%, perps 25%, TTSE 15%, premium 10%, institutional API 10%, referrals 5%, bridge 5%). $LIMER tokenomics with staking tiers, governance roadmap, and 2% Solflare Wallet Boost allocation.

Key Findings

1. **Zero direct competitors** in Colosseum's 5,400+ project database combine all of Limer's core features
2. **Two accelerator-backed projects** (Rekt, The Arena) share partial overlap but lack education entirely
3. **Caribbean regional focus is completely uncontested** — no project in the database targets the region
4. **Cross-cluster positioning** between education (c24) and trading (c6) creates a unique, defensible niche
5. **Highest feature density** of any comparable project — 17 pages, 4 trading modes, 8 education modules, 189 tests
6. **Regulatory advantage** — T&T VASP Act 2025 + local Wam partnership creates a moat no global competitor has

---

Risk Factors

- **Rekt (C4 accelerator)** is the strongest indirect competitor — gamified perps with real money. If they add education, overlap increases
- **Solo founder risk** — most prize-winning teams have 2-5 members
- **WAM VASP status** — needs verification that Wam holds or is applying for a VASP license under the 2025 Act
- **Paper vs. production gap** — paper trading and perps simulation are client-side; on-chain trading is Jupiter-only
